About Me

I'm an engineer passionate about programming and creating my own tools. I've made my path in development in a self-taught way and every day I'm constantly learning.

I'm looking for opportunities to work with those who are willing to share their knowledge as much as I want to learn.

Experience

Project Engineer @ CLL S. A.

April 2018 - Today // Buenos Aires, AR

- Design and development of projects in the basic and detailed engineering phases.
- Technical assistance and consulting for the preparation of investment and feasibility studies.
- Design of industrial process plants through 3D modeling tools.
- Bill of materials and metric computation for the evaluation of investment budgets.
- Stress analysis in pipelines.

Project Engineer @ DAMKE

June 2017 - March 2018 // Buenos Aires, AR

- Development of basic and detailed engineering for industrial, residential and commercial works.
- Preparation of specifications for the contacting of products and services.
- Conduction of bidding processes.
- Monitoring and inspections of works, control of contractors.

Piping Engineer @ COSA

June 2013 - August 2016 // Maracaibo, VE

- Development and review of technical specifications and data sheets for mechanical equipment.
- Piping and equipment plans.
- Stress analysis in pipelines.
- 3D modeling of piping systems and equipment.
- Database administration for 3D design projects.

Skills

Programming Languages

Javascript (ES6), HTML, CSS, Dart, C#

Libraries & Frameworks

React, Node.js, Express, Bootstrap, JQuery, Flutter

Tools & Platforms

Git & GitHub, Heroku, Netlify, Postman, Robo 3T, Unity

Design

Figma, Affinity Designer, Aesprite

Languages

Spanish (Native), English (Advanced)

Education

Web Development Bootcamp

2020

London App Brewery. Online Course

Mechanical Engineering

2008 - 2012

Universidad del Zulia. Cabimas, VE

Projects

MeetUP

A web app for video calls. Developed to study P2P connections using the WebRTC. Built with React.

MovieSearch App

A simple app to search for information about movies and tv shows. Developed to study the connection to an external API and make data requests. Built with React.
